

▶ CS Theory Toolkit: Course Outline || @ CMU || Lecture 1a :

- TCS in the course: Algorithms + Computational complexity (Theory a)
 - STOC/FOCS (2 main conferences)

▶ How to do CS Theory || @ CMU || Lecture 1b of CS Theory Toolkit

- TCS research: Similar to math research
- Keep up to date with blogs/announcements/talks
 - CMU Theory, TCS+, Princeton TCS, Shannon Channel, Simons Institute, etc.
 - SODA/CCC (algorithms/complexity)
- arxiv/ECCC for papers
- Save papers and maintain a lifetime.bib file
- LaTeX editors: WinEdt, TeXnicCenter, Sublime, Emacs
 - Maintain stub .tex and .sty files
- Inkscape to draw diagrams (maybe TikZ)
 - Could also use powerpoint/google slides
- www.ams.org/mrlookup to get .bib files

▶ Street Fighting Mathematics || @ CMU || Lecture 1c of TCS Toolkit

- Always look up info if available
 - Inverse symbolic calculator
 - mathoverflow.net (similar to stackoverflow)
 - Similar math/cs stackexchanges
- Matlab for numerical answers
